Union Gives Back

A Holiday Donation Wraps Up 2009

Philanthropic involvement has always played a big part at Union Leasing, from the individual level and the corporate level.

In looking back on how fortunate we were for 2009, it seemed only right that we celebrate our year of hard work with a fund raising event for a local charity. Since 1975,

Shelter, Inc. (www.shelter-inc.org) has provided short and long-term housing for children and teens in the Northwest Suburbs of Chicago, as well as helping first time families prepare for parenthood.

Carol Brown, Director of Development at Shelter stated *"We are truly grateful for Union Leasing's very generous gift. Please know that these funds will play a significant role in our ability to provide children with a place for refuge and safety."*

We are humbled by the hard work they do every day to provide health care, housing, and to help these young individuals heal and grow. We are extremely pleased to have been able to give them a generous donation on the behalf of Union Leasing. None of this would be possible without the loyalty and dedication of our clients and the hard work of our employees.

Coming Soon!

Since the launch of our client website, it has grown through the addition of features and reports, but it wasn't until recently that we have dedicated the time and resources to developing an all new client website.

Client and prospective client feedback has always, and will always drive the content and functionality of our client access website.

We are proud to tell you first, that in the near future Union Leasing will launch myFleetLink.

This client access site will have a totally new look, provide all the tools and resources that are currently available, plus the opportunity to view a snapshot of your fleet metrics and build a vehicle for online ordering.

Green Tip of the Month

Jump into the (Car)Pool
www.thedailygreen.com

Cut your carbs going to work. Carbon emissions, that is. Buddy up for your daily commute. If not every day, then even a once a week, carpooling can make a sizable difference.

If your drive to work is 25 miles each way and at least half is in stop-and-go traffic, you'll save almost 10 percent of your monthly emissions. Not to mention the gas dollars you'll save and the fun you'll have sharing office gossip with your friends.

In many places, carpooling can save you even more time and money, because pairing up allows you to skip tolls on bridges, or opens up access to less-clogged high occupancy vehicle lanes
